Drain Installation Guide

Where connections form the primary connection to the drainage system, a WaterMark™ approved puddle flange must be used.

The installation guide shown below is a practical reference to installers only - please consult your local authority for full details as they relate to your specific circumstances. If in doubt call a qualified plumber.

Typical Installation Detail

Waterproof the shower, wall and the floor including the puddle flange

1. Use flexible sealant at corner joints
2. Use approved sealant to glue the outlet
3. Use PVC pipe connector to sewer
4. Use clear bathroom silicone to join the drainage end caps
5. Always use waterproof membrane under the top screed
6. Make sure the fall is always towards the grate
